DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to a focal plane plate for a camera with light-sensitive semiconductor sensors, classified in class 257, subclass 678.
- II. Claim 20, drawn to a method of making a focal plane plate for a camera with light-sensitive semiconductor sensors, classified in class 438, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case Examiner asserts that the product as claimed can be made by another and materially different process, namely that the step of measuring a position of a surface of the light-sensitive semiconductor sensors with respect to an underside of the housing is not necessarily needed in order to make the claimed product. Therefore the product can be made by simply forming the surface of adjustment elements and connecting the semiconductor sensors to the adjustment elements.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required

Art Unit: 2615

for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
